Sealaska Environmental Services, LLC

Sealaska Environmental Services, LLC (SES) is a subsidiary of Sealaska Corporation established in 2003. SES Provides services in:

Environmental Remediation

Civil and Environmental Engineering

Environmental Planning, Permitting, and Compliance

Water Resources

SES mission is to provide the highest level of service, quality and value to our clients. Our philosophy centers on developing and sustaining long-term relationships that are based on trust, innovation and technical quality. Our interdisciplinary team of scientists, engineers and planners provide integrated solutions to the project challenges faced by government agencies, Tribes and private industry.

SES offers clients the responsiveness of a small business with the corporate resources, business systems and financial capacity to take on large and complex projects. As part of the larger Sealaska Corporation, we place significant emphasis on global solutions to protect the environment and ocean health. We are dedicated to partnering with our clients in a cost efficient manner that provides value, innovation, and long-term benefit to their projects. SES has successfully executed more than \$300 million in technical services contracts over the past 13 years for federal, state and local government, ports and private industry.

Sealaska is an Alaska Native Corporation Founded in 1972. With an extensive network of employees and active subsidiaries, and over 21,000 tribal member shareholders, we offer our clients and customers a well-established corporate structure with a reputation built on core native values and a dedication to excellence.

Sealaska's 8(a)s and small business subsidiaries offer a full spectrum of services and solutions including:

- Construction
- Data Management and Analytics
- Systems Engineering, Technology Integration and Development.
- International Logistics
